Projects

Umamin — *QA & Contributor* github.com/omsimos/umamin

- Performed QA testing and shipped feature updates for an encrypted anonymous messaging platform with **3M+ users** and **17.5M+ page visits**, working directly with the founders on performance and stability.
- Merged a fix for duplicate-username error handling in account creation (**Next.js, TypeScript**).

Eclipse — *Co-Maintainer* github.com/Kirazul/Eclipse

- Co-maintain a **C++** cosmetic overlay for WoW 3.3.5a with **1,000+ concurrent players** and a **900+ member** Discord.
- Shipped per-zone world styling and fixed **Direct3D 9 / ImGui** rendering bugs, including stale UI textures.
- Built Python reverse-engineering tooling that verifies every client memory address in the source against the game binary, and removed **213 unused functions** and **286 dead symbols** through linker analysis.

Art N Me github.com/seolyam/artnme

- Built a full-stack order management system and public landing page for a local printing business using **Next.js, TypeScript, Supabase, and Drizzle ORM**, handling customer quote requests and day-to-day shop operations.
- Developed a 3D apparel customizer in **React Three Fiber and Three.js** with graphic upload, colors, and 360° export.
- Added a staff portal with a payment ledger, per-order activity log, job assignment, and daily reports, covered by **Vitest** and **Playwright** tests.

Experience

Software Developer Intern, *Negros Electric and Power Corporation (Negros Power)* Jan 2026 – Mar 2026

- Built an internal budget submission tool with a 3-tier approval workflow (Requester → Reviewer → Approver) using **Next.js, TypeScript, Supabase, and Drizzle ORM**, with validated forms in React Hook Form and Zod.
- Built a booking and visitor management system with QR code check-ins, request tracking, admin dashboards, audit logs, automated email notifications, and PDF/PNG export of requests.
- Merged **60+ pull requests** across both systems, including mobile layouts and client-side filtering.

Web Development Lead, *Google Developer Groups on Campus – USLS* Aug 2024 – Apr 2026

- Led development of the chapter's event and project showcase platform in **Next.js, TypeScript, and Tailwind CSS**, serving a **550+ member** chapter across **20+ events** and **10+ projects**.
- Built internal tools and showcase pages end to end, from responsive UI to backend services, for **1,000+ participants**.

Open-Source Contributor, *Skua & Transmorpher* Jul 2022 – Present

- **Transmorpher** (WoW 3.3.5a appearance suite, **Lua**): merged 3 PRs, including loadout import/export (700+ lines) and the v1.1.9 release with performance improvements and legacy cleanup.
- **Skua** (AQW automation, **C#**): contributed an automation script, merged into the community script library.

Education

University of Saint La Salle, BS in Information Technology Aug 2022 – Apr 2026

- **Magna Cum Laude** — GWA 1.36 / 96.4% (1.00 is the highest grade)

STI West Negros University, Senior High School (Mobile App & Web Development) Jun 2020 – Aug 2022

- Highest Honors (98 average); **Champion, Research Colloquium 2022**
- Co-developed Trackasone, an open-source collaborative task tracking platform used by students and faculty

Technical Skills

Languages: TypeScript, JavaScript, SQL, C++, C#, Python, Lua, HTML, CSS
Frontend: React, Next.js, Tailwind CSS, shadcn/ui, React Hook Form, Zod, React Three Fiber, Three.js
Backend & Data: Node.js, Supabase (PostgreSQL, Auth), Drizzle ORM, Turso
Testing: Vitest, Playwright
AI Tools: Claude Code, OpenCode, Ollama, llama.cpp (local LLM inference with open-weight models such as Qwen)
DevOps & Tools: Git, GitHub Actions, Vercel, Railway
